Description

Doosan D25S-5 diesel forklift from 2018 with a lifting capacity of 2,500 kg. A strong and reliable forklift that is still used by us on a daily basis. The machine starts well, drives well and brakes well. Equipped with a reliable Yanmar diesel engine. Specifications: Year: 2018 Lifting capacity: 2,500 kg Approx. 12,500 operating hours Yanmar diesel engine Fork positioner Sideshift Fully enclosed cab Lights Good tires Known issue: The forklift works well during normal use. However, when a lot of forward pulling power is required, for example when driving up a steep loading ramp or onto a trailer, it does not pull properly. During normal lifting and handling work, this does not cause us any problems. The forklift is currently still in daily use. Due to this known issue, the machine is offered at a competitive price of €5,250.
